CAREER OBJECTIVE

A Computer Science & Data Science undergraduate with hands-on experience in AI development, NLP, and full-stack web technologies. Proven through an AI internship and projects in deep learning, face recognition, and sentiment analysis. Eager to leverage technical expertise and analytical skills to build impactful, data-driven solutions in a forward-thinking organization.

SKILLS

Programming Languages	Python, Java, Data Structures
Core	SDLC, Oops, Agile, Requirements Gathering, Prototype Validation, Unit Testing
APIs & Integration	REST API integration, Email-to-Telegram automation, validation & testing
Web Development	HTML, CSS, Java Script, React JS, React Native, Angular JS
Database	SQL, MongoDB
Data Handling & Analysis	Data cleaning, Preprocessing, Transformation, Model Evaluation
AI & ML	NLP, Deep Learning

EDUCATION

R.V.R. & J.C. COLLEGE OF ENGINEERING — Sep 2022 - June 2026

B.Tech in Computer Science & Engineering (Data Science) — CGPA : 8.47

EXPERIENCE

AI Intern | 4sight AI (Offline) — [May 2025 – JuL 2025]

- Contributed to the development and testing of AI-driven applications by supporting code development, unit testing, and functional validation in alignment with defined processes.
- Assisted in understanding business and technical requirements, preparing technical documentation, and collaborating with team members to deliver scalable solutions in an enterprise environment.

CERTIFICATIONS

- The Joy of Computing using Python – IIT Ropar (NPTEL, 2025)
- Artificial Intelligence Fundamentals – IBM
- Programming, Data Structures and Algorithms – IIT Kharagpur (NPTEL, 2024)

PROJECTS

Face Recognition Attendance System

- Designed a real-time attendance system using DeepFace (FaceNet + cosine similarity) with optimized preprocessing for lighting variations and SQLite-based storage, enabling fast and reliable multi-branch student authentication.

NGO Website Development

- Designed and deployed a responsive website for an NGO to manage donations, share initiatives, and provide organizational information with a user-friendly interface and optimized performance.
  Live Website: https://www.viswavignanavaaradhi.org/

Emotion-Based Sentiment Analysis Using BERT

- Designed and implemented an application for automated attendance using face recognition, involving requirement analysis, preprocessing, model evaluation, unit testing, and structured data storage to support reliable system performance.

Doc to Data Extraction System

- Developed and validated a multi-class emotion classification model using NLP techniques, performing data analysis, model evaluation, and performance assessment to derive meaningful insights from text data.

Email-to-Telegram Notifier

- Supported the design and testing of an automated notification workflow by integrating APIs, validating outputs, and ensuring adherence to defined operational processes.

POSITIONS OF RESPONSIBILITY

Student Coordinator | College Fests & Cultural Events

- Organized college fests and cultural events, managing logistics, planning, and execution to enhance student engagement.
